IDEAS WANTED

The ACCJ Healthcare Committee invites you to join us at “Healthcare x Digital” to solve Japan’s most critical community healthcare and individual patients’ needs through digital technology. Especially we are looking for solutions in the following three areas:

1. Overcoming the urban vs rural healthcare divide
2. Re-imagining the hospital of the Future
3. Empowering patients to take ownership of their health through technology

At this Pitch event, you will be able to share and learn about the most innovative healthcare solutions for Japan and have the opportunity to develop partnerships to make them a reality.

We are fostering partnerships that lead to the creation of eco-systems by bringing together private innovators, healthcare companies, digital companies and government. We await your participation!
